## **RESTRICTION INTO GROUPS**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-31, drawn to a method of delivering a compound to, into, or across a barrier, classified in class 424, subclass 9.1.
  - II. Claims 32-40, drawn to a composition comprising a biologically active agent and a delivery-enhancing transporter, classified in class 564, subclass 230+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the method may be used with various compounds such as hormones, vitamins, and antiviral, antibacterial, antifungal, antiproliferative, immunosuppressive, or analgesic agents.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

## **ELECTION OF SPECIES (*for search purposes only*)**

4. Claims 1-40 are directed to a plurality of disclosed patentably distinct species comprising compounds and uses thereof ranging from various hormones, vitamins, and antiviral, antibacterial, antifungal, antiproliferative, immunosuppressive, and analgesic

agents. Thus, Applicant is respectfully requested to elect a single disclosed species, even though this requirement is traversed.

**Note:** *The Examiner respectfully requests that Applicant elect a single disclose species from within the elected group. If Group I is elected, Applicant is requested to elect a specific transporter and a specific compound. If Group II is elected, Applicant is requested to elect a specific biological agent and a specific transporter. In addition, Applicant is respectfully requested to state which claims are drawn to the elected species.*

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Mr. William Kezer on 1/31/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1616

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (703) 308-4640. The examiner can normally be reached on Mon.-Fri. (alternate Mon.), 6:45 a.m. - 4:15 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose' Dees can be reached on (703) 308- 4628.
